

Ideation Phase - Empathize & Discover

Date	17 July 2026
Team ID	-----
Project Name	Rising Waters: A Machine Learning Approach to Flood Prediction
Maximum Marks:	4 Marks

Empathy Map Canvas:

An empathy map is a simple, easy-to-digest visual that captures knowledge about a user's behaviours and attitudes.

It is a useful tool to help teams better understand their users.

Creating an effective solution requires understanding the true problem and the person who is experiencing it. The exercise of creating the map helps participants consider things from the user's perspective along with his or her goals and challenges.

Empathy Area	Details
SAYS	Needs timely and accurate flood

	warnings; wants simple prediction results.
THINKS	Wonders whether the area will flood and if the prediction is reliable.
DOES	Checks weather forecasts, follows alerts, prepares emergency supplies.
FEELS	Anxious during heavy rainfall; relieved by early warnings.
PAINS	Delayed alerts, inaccurate forecasts, property damage, evacuation difficulties.
GAINS	Early flood prediction, better preparedness, improved safety, reduced losses.
Project Solution	ML-based XGBoost flood prediction with Flask web app for real-time flood risk prediction.
